

I am writing to ask you not change your current allocations of FM radio frequencies. My family and I listen almost exclusively to Christian radio, and I'm very concerned that changing the allocations of FM frequencies to give priority to LPFM stations. Currently with K-Love, American Family Radio, and Air1 I can let my children listen to public radio without being concerned about what they will be subjected to by the disc jockey or radio host. One only has to look at the ongoing battle between the FCC and "shock jocks" to see what our children could be subjected to if the new proposals are adopted. To lose these stations would cause great heartache to my family and would limit our listening possibilities greatly. Please don't reallocate our FM frequencies.
